Pain-Capable Unborn Child Protection Act

July 29, 2011

Pain-Capable Unborn Child Protection Act recognizes that medical science demonstrates that unborn children are capable of experiencing pain certainly by 20 weeks after fertilization. The Act protects pain-capable unborn children from being killed by abortion absent of significant risk to the mother.

Web Cam Abortion Ban

June 13, 2011

"Web-cam abortions" are abortions done by a video conferencing system where the abortionist is located at one location and uses a closed circuit TV to talk with a woman who is at another location over a computer video screen. The abortionist never sees the woman in person. They're never actually in the same room.

Several states have enacted laws requiring abortionist to be physically present in the room before administering chemical abortions upon pregnant women.
