

ARKANSANS FOR LIMITED GOVERNMENT

ARKANSAS MEDICAL PROFESSIONALS SUPPORT THE ARKANSAS ABORTION AMENDMENT; CALL FOR VOTERS TO PUT HEALTHCARE DECISIONS BACK TO PATIENTS AND THEIR PROVIDERS

A message to the people of Arkansas from Arkansas Healthcare Professionals:

We are Arkansas-based physicians and healthcare professionals from around the state working in specialties ranging from obstetrics to pediatrics to cardiology to emergency medicine, and we are deeply concerned about our ability to properly care for our patients under Arkansas's near-total abortion ban. The current law — which provides no exceptions for the health of the mother or for rape, incest, or fatal fetal anomaly — is at odds with our medical training and harmful to Arkansans.

Over the last two years under the ban, we've been prevented from providing up-to-date standard of care medicine to our patients and, in some cases, forced to watch as they and their families suffer despite the availability of better treatment options. When we entered into this profession, we knew suffering would be inevitable — we signed up for it. But we didn't sign up to have our professional expertise discounted by a government that denies our ability to relieve that suffering.

We believe deeply in bodily autonomy and the sanctity of the doctor-patient relationship, both of which are violated by the abortion ban. There are many nuanced reasons why a pregnant patient may choose to have an abortion: she may have been attacked and impregnated by a family member; she may have cancer and require treatment that is risky for her fetus and pregnancy; her fetus could have developed without a brain or kidneys; her birth control may have failed her. Regardless of the reason, physicians should be able to privately and accurately counsel patients about all of their options, and patients should be able to make decisions about their health and wellbeing, free from government interference. A government that infringes on its people's access to critical medical care and threatens its medical professionals with jail time and exorbitant fines for caring for their patients is cruel, unethical, and un-American.

The stakes here in Arkansas are especially high. We have the worst maternal death rate of any state in the nation. Nearly half of Arkansas counties have no obstetric providers and no option for prenatal or delivery care. Pregnant patients, already vulnerable, have been forced to travel hundreds of miles for routine treatment. Simply put, it is dangerous to be pregnant in Arkansas. Under this ban, seasoned doctors are leaving the state and young doctors are choosing to study and advance their careers elsewhere. This exodus can only lead to a weakened healthcare system and worse health outcomes for everyone. Allowing these trends to continue would be a deadly tragedy.

You, the people of Arkansas, deserve so much better. Right now you have the opportunity to help us change the law and the future for all Arkansans. You can restore access to reproductive healthcare for patients who desperately need it. You can sign the petition to put the Arkansas Abortion Amendment on the ballot and then vote for it in November. We know Arkansans to be compassionate, generous, thoughtful people with a commitment to liberty. We are hopeful that you will join us in calling for the government to get out of our exam rooms.

ARKANSANS FOR LIMITED GOVERNMENT
